

Technical (Integrated Security Solutions)

Introduction

Founded in 2000, Secure Services Limited W.L.L is a Bureau Veritas ISO 9001: 2015 accredited company and its Technical Division is your professional partner for Modern Security, Safety Systems and Solutions.

The Technical Division has the ability to understand client expectations and how to aligning their personal security or organization's specific target segments. We put all our clients at the center of the decision making process in relation to the delivery of products, services and experiences to create customer satisfaction, loyalty and support.

We achieve our goals through the implementation of industry best practices governed by local and international standards and by simply communicating with our clients where we invest time to identify the client's primary and ongoing requirements.

Our services are tailored and we design a complete solution to the meet client requirements and we ensure that the client's initial and long term experience can continue to evolve through regular upgrades and by maintaining their ideal solution.

At the core of our Technical Division is a highly skilled team of international professionals who are committed to helping our clients achieve their goals.

Services

Security & Safety Equipment

Specialized in Camera Surveillance Analogue and IP Based Access Control Time & Attendance Access Barriers, High Security Bollards, Perimeter Protection, Security Audits, Electronic Bugging Sweeps, Fire Detection Analogue & Addressable, Fire Fighting, Fire Suppression, Kitchen Hood System and Security Assessments for Commercial & Residential Buildings, Design and Implementation to the Customer needs and requirements.

Industrial Products

Total Welding Solutions, Construction Equipment & Machineries, Construction Material, Scaffoldings, Automotive Equipment, Survey Instruments, Access and Manhole Covers, Waterproofing Material, Power Generators and Air Compressors, Survey Instruments, Total Stations, Theodolite, Auto Levels, 3D Lase Scanning System, GNSS Surveying Systems, Digital and Field Software

Airport Consultancy

We support our customers in enhancing the airport business through the excellence of their operational processes, supported by the most suitable technology, always regarding the specific context, features, expectations, ambitions and constraints of each airport towards Operations, Technology and Digital Transformation

Renewable Energy Solution – Solar Power System

Solar Energy Technologies accelerates the advancement and deployment of solar technology in support of an equitable transition to a decarbonized economy.

We Design, Installation and Maintenance of:

- Integrated Security Solutions
- Closed Circuit Television Systems
- Commercial and Residential Security Alarm Systems
- Control Room Design and Equipment Integration
- Biometric (Fingerprint) Control Systems for Building Access, Computers, etc.
- Video Intercom Systems
- Digital and Analogue Recording and Transmission Systems
- Under Vehicle Surveillance Systems
- Perimeter Security
- Satellite Vehicle Tracking Systems
- Facial recognition System

Fire Alarm Systems

- Fire Fighting Systems (Hose reel, Sprinkler, Wet Riser)
- Automatic Fire Suppression Systems and Fire Extinguishers
- Kitchen Hood Fire Suppression System

Perimeter & Building Access Control

- Barrier Systems
- Bollard System
- Metal Detectors
- Security Surveillance platforms with Artificial Intelligence

Call Systems

- Nurse Call Systems
- Public Address Systems

Other Electrical Support Systems

- Electrical suspension & support materials
 - Airport Runway Lighting Systems
 - Helipad Lighting Systems
 - Solar Power Systems
-
